# POLE SIGNS MONUMENT SIGNS

The purpose of a monument sign is not only to make your business easy to find, but also to leave a memorable impression on all who see it. Dramatically increase your business's exposure and strengthen your corporate identity with the professional elegance of monument signs from Eastern Signs, Inc.

Using a wide range of materials, colors and creative design elements, we will build a monument sign that not only promotes your business, but also becomes a vital link in your marketing efforts.

# NEON & LED

These Custom Neon Signs form colored lines with which a text can be written or a picture drawn, including various decorations, especially in advertising. By deciding the sequences of switching parts on and off there are many possibilities for dynamic light patterns which form animated and fun-to-look-at images. Because of its long life span, low maintenance, and range of color choices, neon is perfect for architectural lighting, theatrical sets and commercial displays as well as many other applications in the commercial arts.

# PUSH-THRU SIGNS

Push through signs are created so that only the letters and logos are illuminated. These aluminum and acrylic signs are structured in a way where only the letters and logos are illuminated. These signs are idealistic for indoors as well as outdoors. Push through signs give an eloquent and sophisticated look for any kind of business.

# SANBLASTING SIGNS

Sandblasted and routed signs can be created from either wood or a synthetic material known as precisionboard HDU (High Density Urethane). The techniques used to create these signs produce signs that end up being similar to carved signs, but are less costly. Sandblasting and routing can produce great three-dimensional signs for any use.

# 3D SIGNS

Eastern Signs carries a complete line of sign letters and 3D letters to add substance to your company's message and image. We offer an array of sizes, colors, type styles and materials that can be applied to indoor and outdoor signs. Sign letters and 3D letters for exterior signs can be used outdoors for building signage, walls or entrance doorway signage. For interior signs, 3D letters can be incorporated to add visual interest to any representative's office. We will be happy to visit your office to discuss options for materials, design, sizing and mounting.

## VINYL GRAPHICS & DIGITAL PRINT

COMPUTER-CUT VINYL SIGNS and DIGITAL PRINTING SIGNS are the most commonly used sign types today. Often replacing the tradition hand-painted signs, they can be used in many different types of signs, such as indoor and outdoor signage. Adding to their popularity is the fantastic color range. You can select from a mass of solid colors, reflective, fluorescents, metallic's, translucent, and more. Vinyl's and DIGITAL PRINTS are also available with permanent and removable adhesives.
